

Precision relay race

GameProgression

1. In front of each player mark out a floor disc, tennis ball, small traffic cone and marker cone.
 2. Each player races:
 - a. first to the ball and return to place on the marker
 - b. then to the traffic cone and places it on top of the tennis ball
 - c. Finally to the marker cone and places it on top of the traffic cone.
 3. Race is only complete when all objects are placed on floor disc correctly- hence 'precision'
-
1. Have players set this up in smaller groups and race of between each other 'winner stays on style'
